**enter their gender as "male" or "female." If the gender is "female,"
the program should display "Allowed," and if the gender is "male," it
should display "Not Allowed.**

```
let gender = prompt("Enter your
gender (male/female)")
if (gender === "female") {
console.log("Gender is female. You
are allowed.");
} else {
console.log("Gender is not female.
Males are not allowed.");
}
```
