Question 3) : Create a program that asks the user for two numbers and determines which one is larger. Print the larger number

```
let num1 = prompt("Enter the first
number:");
let num2 = prompt("Enter the
second number:");
if (num1 > num2) {
console.log("The larger number is:",
num1);
} else {
console.log("The larger number is:",
num2);
}
```

Start

Enter 1st
no.

Enter 2nd
num

False   num1 > num2   True

2nd
num is
large

1st
num is
large

End
